

AR ART EXHIBITION ON-DEMAND

Flights of Fancy

SUMMARY

Flights of Fancy

A multimedia solo exhibition by South African artist, Benjamin Mitchley.

Experience this **anaglyph 3D augmented reality art exhibition** using the Artivive App while wearing **Red and Cyan anaglyph 3D glasses** to see the **3D effect**.

Each digital artwork and its connected augmented reality animation is rendered with an anaglyph 3D effect. Anaglyph 3D is the stereoscopic 3D effect achieved through encoding an image for each eye using filters of different chromatically opposite colours, typically Red and Cyan. When viewed through colour-coded anaglyph glasses, each of the two images reaches the eye it's intended for, revealing an integrated stereoscopic image.

The visual cortex of the brain fuses the images into the perception of a three-dimensional scene or composition.
