AR ART EXHIBITION ON-DEMAND

Pictures of Tomorrow

SUMMARY

PICTURES OF TOMORROW

PICTURES OF TOMORROW revolves around the question in which direction the technological revolution will propel our society in the coming decades. Michaela Konrad's research addresses questions about the future of work, the significance of the gaming industry, the amalgamation of states and transnational corporations as well as the ever-increasing threat from environmental destruction.

What happens to people whose actions are constantly recorded, analysed and utilised?

Where do personal goals lead us in a world in which the algorithms of Google and Co. know us better than we know ourselves?
